

Microsoft Excel: Introduction

Duration: 1 Day

Introduction/Summary

This course is designed for those using Excel for the first time or for those who want to revisit the use and creation of formulas. It will provide learners with the confidence to experiment with the basic features and functionality of the package.

Microsoft Excel helps you create, analyse, and share spreadsheets, and its enhanced formatting features will allow users to analyse and visualise data through the creation of graphs and charts.

TheLightBulb's Microsoft Excel Introduction course will cover the foundations of spreadsheet skills.

Outcomes

By the end of this course you will be comfortable setting up and using spreadsheets in Excel and will be able to manipulate your data using formulae.

Content

The workshop aims to cover the following content:

- Explore the Excel Screen
